

## OR1 Frog Climbing System

F40

\$182.50

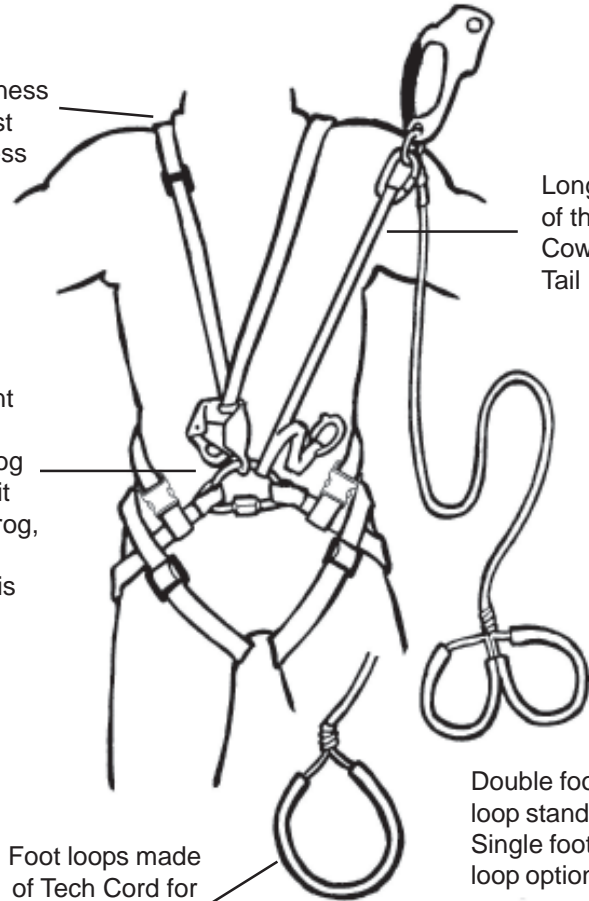

- ✓ Lightweight and versatility make this the most commonly used system in the world.
- ✓ The climber is able to wear the system while moving through a cave - perfect for multi-drops and rebelay.
- ✓ This is also a great system for rope rescue.
- ✓ This system includes:
  - 1 - PMI Frog 'H' Harness (SG51047)
  - 1 - Petzl Ascension - Left (B17L)
  - 1 - Petzl Spelegyca Cow's Tail (C44)
  - 1 - Petzl Croll (B16)
  - 1 - 10mm Maillon Rapide Half-Round - Galvanized Steel (WL-950-GS)
  - 2 - Kong Guide Key Lock Carabiners (733)
  - 1 - OR1 Frog Double Foot Loop (F10)

"H" Harness  
Chest  
Harness

Long leg  
of the  
Cow's  
Tail

A low attachment seat harness is important for Frog climbers. The Pit Viper, Goliath Frog, Superavanti or Fractio fulfills this need.

Foot loops made of Tech Cord for super strength and durability

Double foot loop standard, Single foot loop optional

### Why a left handed ascender with a Frog System?

During the stand-up motion, the Croll rises to meet the handled ascender. If large steps are desired and the foot cord is short, there is a possibility that the two ascenders could become jammed. Using the Left Ascension with the Croll will provide the easiest arrangement for freeing up the jam. Use the left hand to advance the left ascender.

Notice the Croll and Ascension bodies are turned out and clear of each other.
