

Webbing & Accessory Cord

Webbing & Accessory Cord

- ✓ Webbing is available in 2 styles: tubular and flat. Tubular webbing is more common in the recreational market with a large array of colors and inexpensive price. Flat webbing is stronger and slightly thicker than its tubular counterpart.
- ✓ The colors listed are the ones that we usually have in stock. Since many manufacturers change colors through-out the year, designate "bright" or "earthtones" when choosing colors, or ask what is in stock at the time of your order.
- ✓ The first 2 cuts of each item & color are free. All additional cuts may be subject to a cutting charge.

PMI Sport Rope - Static

- ✓ PMI's trademark terms **Max Wear** and **EZ Bend** refer to the sheath construction of static rope.
- ✓ **Max Wear** offers superior abrasion resistance against sharp edges and gritty conditions. **Max Wear** stiffness can make tying knots and stuffing into rope bags harder. The sheath of this rope is white with a red stripe.
- ✓ **EZ Bend** is just as strong as **Max Wear**, but is more soft and supple. **EZ Bend** is more flexible which makes tying knots and stuffing into rope bags easier. The sheath of this rope is white with both a red and a black stripe.
- ✓ PMI **Pit Rope** is the original rope that made PMI famous with cavers. It is an all white (no stripe), **Max Wear** rope.
- ✓ All are made with a nylon sheath and nylon core, except for the **P6** line. P6 ropes have a polyester sheath.
- ✓ Standard spool lengths are 30m (98'), 46m (150'), 61m (200'), 92m (302'), 183m (600'), 200m (656') and 366m (1201'). However, OR1 stocks this rope by the spool so special lengths are possible.

*** When ordering, specify whether you want **Max Wear ("M")**, **EZ Bend ("E")** or **"Pit Rope"** ***
